MP100 | FINAL PROJECT STATEMENT | RIN QUIROZ

Title: Opposites Attract.
Semester/Year: 2023
Software, coding/programming languages: HTML / BRACKETS / PHOTOSHOP / PAINT TOOL SAI

In my project, I drew two drawings of a female and a male couple: both in different aesthetics in attire. The story is they're a couple in love! I included some dreamy-like happy music to fit the mood. I chose this theme because it seemed like a common concept in couples that I've seen in media/Anime. I was heavily inspired by my favorite anime, Nana. The challenging part of this project was the creative process… I struggle with storytelling the most, I mostly like making pretty drawings and things I like to look at. I didn't struggle too much with the website building.

CREDITS
Art is created by me. (Rin)
SOYMILK FONT BY **DENISE BENTULAN** (c) 2012 (Found on DAFONT.COM)
Music by **FASSounds** from *Pixabay "Goodnight"*. (https://pixabay.com/music/beats-good-night-160166/)

CREATIVE BRIEF

Student's first and last name:
Rin Quiroz

Project title:
Opposites attract

Project description: *(Answer each questions)*
Summarize your story: They're a cute couple and they're in love. Opposites attract! Yin and Yang.   **What media will you be embedding on the webpage**   I'll be using two drawings, representing a feminine light side and a dark masculine side. They're both close/around the same size; 2000x2000 and I put them side by side to represent dark and light. I also included some music to set a cute romantic mood.   **What is the general style/emotion you want to convey?**   I didn't necessarily draw this couple based on a specific emotion; I just thought it would look cute. I wanted to showcase this couple's personality / difference in appearance, and I thought it would showcase my work well and the different shading / coloring styles I can do. I'm obviously going for something more anime / stylized.   **What software will you be using?**   I used Brackets for the website building then uploaded it to GitHub. I used Photoshop and Paint Tool Sai for some of it (Photoshop sometimes crashes on my computer).
